

YOUR TRUSTED FACILITY
SERVICE PROVIDER

THE ENERSYS ADVANTAGE

ONE COMPANY

We are long-game players relentlessly focused on propelling our customers forward through the power of solutions.

ONE POINT OF CONTACT

Streamlining service management by giving you one place to call frees your time for more important endeavors.

ONE INVOICE

One invoice means total transparency, making it easier for you and your team to review charges and process payments.

LET'S POWER A **RELIABLE FACILITY.**

WE ARE DRIVEN BY A PASSION TO KEEP THE WORLD WORKING.

Ensuring uninterrupted operation of your critical facilities, systems and equipment is your highest priority. Managing multiple vendors, invoices, contractors and technicians is not—***that's where we come in.***

With nationwide reach and the technical expertise to build, manage and maintain critical facilities, cell sites, data centers and everything in between, you won't be stuck troubleshooting scheduling, quality control and reporting—***we'll do it for you.***

So rest easy knowing when you go to bed at night our services have ensured that your site won't fail.

Our service technicians are highly trained to perform preventative and emergency work on critical equipment.

Our customers benefit from over 100 years of combined battery and power electronics design, manufacturing service experience for mission critical communications and data facilities.

EnerSys

NO WORRIES

WITH OUR ENGINEER, FURNISH AND INSTALL SERVICES

Our mission is to take the worry out of your next project. Let us do the engineering and design work, spec and furnish all the equipment and handle the installation. In addition to freeing up your valuable time, when we install our products, you get the option of longer warranty coverage, so you **know it's done right and done by a company that stands behind its work**. That's our idea of "Worry Free".

SERVICES

INCLUDE, BUT ARE NOT LIMITED TO:

- Comprehensive project management
- Power system installation
- Battery installation, maintenance and monitoring for 12V, 2V, VRLA, flooded and lithium
- Generator installation and maintenance
- Structure cabling installation
- Solar engineering and installation
- Comprehensive HVAC services

From site prep and construction to system design and maintenance, we can expertly handle any and every phase of your project and facility.

MAXIMIZE UPTIME

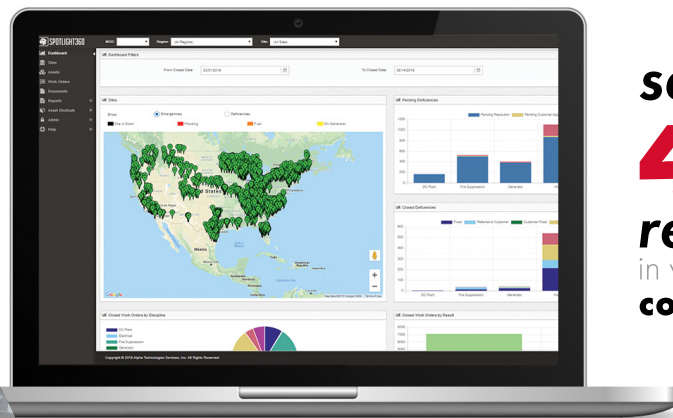

WITH COMPREHENSIVE PREVENTATIVE MAINTENANCE

BENEFITS

INCLUDE, BUT ARE NOT LIMITED TO:

- Nationwide network of trained and vetted technicians
- Spotlight 360 asset management software
- Reduced network downtime by as much as 70%
- Battery removal and recycling
- Environmental and safety
- 24/7 emergency repair service

With **over a century of combined battery and power electronics PM experience**, EnerSys has the expertise and resources to offer turnkey and custom preventative maintenance programs designed to maximize network and critical facility uptime while minimizing costs associated with unplanned downtime, premature equipment replacement and emergency services.

COSTLY OUTAGES

Spotlight 360 elevates the process of asset management to asset science. Our advanced predictive software can help to identify potential issues before they lead to network outages.

ENSURE RELIABILITY

WITH OUR EQUIPMENT TESTING SERVICES

Diagnosing problems before they happen helps to keep your network working. Our equipment testing programs and services are designed to identify potential problems before they become actual problems that can cost you money and cause you stress. Because our team has literally hundreds of years of combined industry expertise, ***we know how to spot potential trouble before it gets you in trouble.***

Regular testing programs help to keep everything from fire suppression equipment to backup generators in ideal operating condition.

SERVICES

INCLUDE, BUT ARE NOT LIMITED TO:

- Battery load bank testing
- Battery status reporting
- Onsite test equipment calibration
- Quality assurance testing
- UPS and generator system testing
- Fire suppression system testing

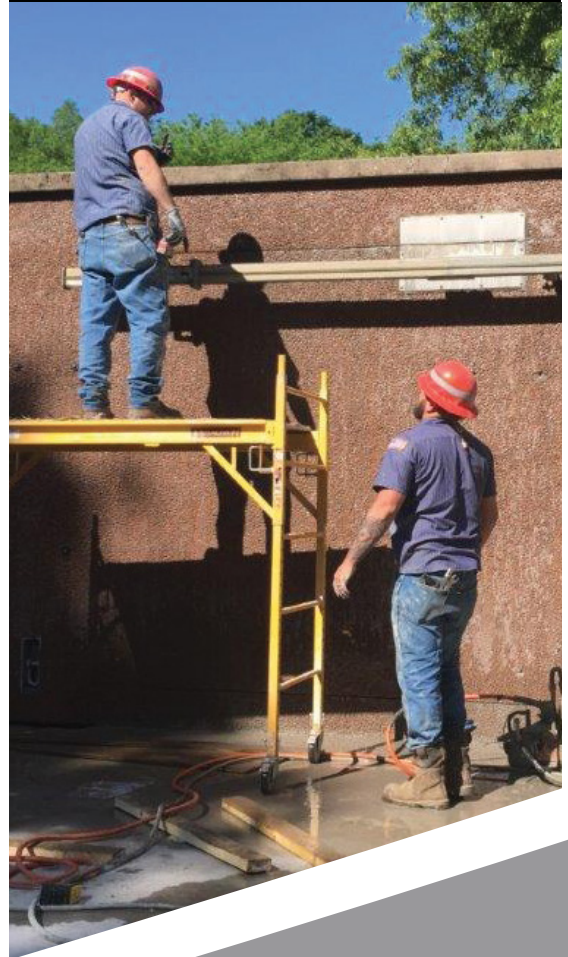

CASE STUDIES

REAL-WORLD EXPERIENCE = REAL-WORLD RESULTS

Progress photo of equipment receiving, staging and installation during a large critical facility EF&I project for a major customer.

Progress photo of facility construction during a build project for a major customer.

Routine HVAC maintenance prevents costly repairs and helps maintain an ideal operating environment for critical facility equipment.

LET'S POWER A RELIABLE FACILITY.

With our collaborative approach and customers' success in mind, we roll up our sleeves, apply our full effort, deep knowledge and industry expertise.
